

## AVIATION SUPPLY CHAIN

# Airframe Parts Supply

Aviation Supply Chain services are just one part of AAR's broad portfolio of innovative solutions for commercial and government customers. We also offer a wide range of maintenance, repair and overhaul services, structures and systems manufacturing and aircraft sales and leasing.

AAR offers a vast inventory of new and refurbished airframe parts for virtually every commercial aircraft type. AAR is a leader in value-added parts services, including parts provisioning, just-in-time delivery, repair and exchange, on-site warehouse management, parts trading, consignment and lease-back programs, inventory management and logistics programs. Each program is designed to reduce costs, increase parts availability and shorten lead times.

At any one of our repair centers, we provide a full array of parts repair, overhaul, exchange and replacement options tailored to meet individual customer requirements and designed to improve efficiency and reduce overall cost. Our extensive in-house repair capabilities support our customers' just-in-time initiatives, reduce program development time and speed project completion.

### Customer Benefits:

- ▶ Reduce overall operating costs and improve productivity through increased on-wing reliability, parts availability and on-time delivery.
- ▶ Eliminate obsolete inventory and minimize warehouse management costs with access to a global inventory pool and customized inventory management solutions.
- ▶ Shorten program development time and speed project completion with in-house PMA and repair capabilities to support just-in-time initiatives.
- ▶ Improve cash flow and simplify project management by using e-commerce tools to develop predictable budgeting and competitive pricing.
- ▶ Streamline supply chain via on-site warehousing, sets management, rotatable exchange and simplified vendor management.
- ▶ Increase confidence by partnering with an industry leader and leveraging AAR's global presence and diverse product/service offerings to meet all of your program needs.

### Competitive Differentiators:

- ▶ *Availability* – We maintain one of the industry's largest and most complete inventories of airframe parts, stocking more than 35,000 items from over 250 manufacturers.
- ▶ *Strength and Flexibility* – We have the global reach and financial strength to move quickly to capitalize on procurement opportunities—large or small—whenever and wherever they become available.
- ▶ *Experience* – We know the industry, and our product specialists have developed an expertise in their specific airframe markets, allowing them to track fleet changes and evaluate parts availability on a global level.
- ▶ *Inventory Management* – Since 1985, we have been supporting airlines, facilitators and original equipment manufacturers (OEMs) by developing inventory and supply chain solutions custom tailored to meet their needs.

*continued on back*

- 
- ▶ *Convenience* – We offer Web based, e-commerce business solutions that allow customers to check inventory availability, order parts and track project status at any time, from any place.
  - ▶ *Scale* – AAR's full range of aviation and aerospace products and support services provides our customers with the convenience of one-stop shopping with the proven experience of an industry leader.
