Steel Nose

P/N: 60136-002*
NSN: 8145-01-469-1010
Rubber Nose

* Sold as a set.

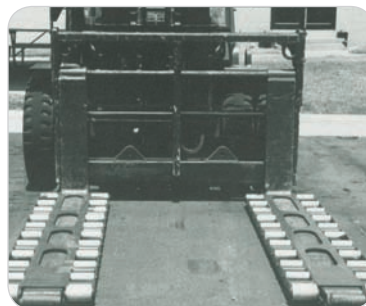

Dimensions: 93" L x 18" W

Capabilities:

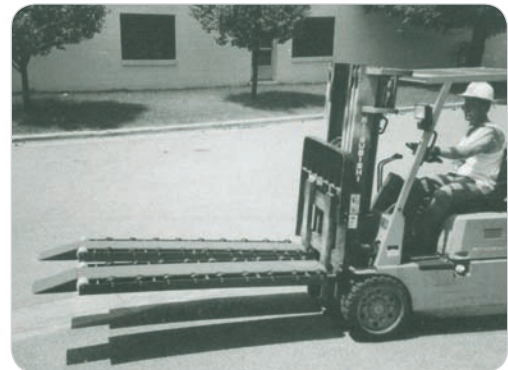

- Use these roller tines on fork lift trucks for rapid loading of air cargo pallets without the need for specialized loading equipment.
- The roller tines slip easily onto a lift truck's forks, turning the forks into a rollerized platform. Roll pallets onto the tines, lift with fork lift truck, transport to the aircraft, tip the lift truck's fork, and the pallets slide off easily into the aircraft.

Features:

- 10,000 pound capacity
- Fast, easy handling of pallets without specialized loading equipment
- Handles pallets of any dimension
- Eliminates the use and storage of pallet trailers
- Handy for locations too small for specialized loading equipment
- Manufactured to fit 72" forklifts

This particular model attaches to a forklift and is used with dunnage at the aircraft for loading. Note the rubber protected nose plate.

This particular model attaches to a forklift and is used to pick up pallets directly from the ground. Note the beveled nose plate.
