AAR RECOGNIZED AS TOP LANDING GEAR SERVICES PROVIDER

WOOD DALE, ILLINOIS (May 7, 2010) — AAR announced today that its Landing Gear Services center was recognized as the best landing gear, wheels and brakes services provider at the recent MRO Americas 2010 Conference held in Phoenix, Arizona.

AAR was one of only two companies to receive multiple awards in the program, earning recognition in both the Landing Gear Services and Wheels and Brakes Services categories. The awards, which recognize superior customer support, excellent turn-around-times and competitive repair pricing, were presented to only 15 of 498 eligible aerospace repair centers around the world.

“We are proud to be recognized as the best overall provider of landing gear, wheels and brakes services,” said Timothy Romenesko, President and Chief Operating Officer of AAR CORP. “The recognition is the result of our employees’ solid execution and enduring commitment to providing excellent service and support for our customers.”

Nominations were solicited from and voted on by more than 13,500 industry professionals.

AAR offers a full range of MRO, supply chain and precision fabrication services and provides landing gear maintenance and exchange services for virtually every type of major commercial, regional and military passenger aircraft in use today.

About AAR

AAR is a leading provider of products and value-added services to the worldwide aerospace and defense industry. With facilities and sales locations around the world, AAR uses its close-to-the-customer business model to serve aviation and government/defense customers through four operating segments: Aviation Supply Chain; Maintenance, Repair and Overhaul; Structures and Systems; and Government and Defense Services. More information can be found at www.aarcorp.com.
