TIE-DOWN KIT

Peck & Hale designed the tie-down kit for "Over the Road and Rail Transport". The tie-down kit is specifically designed for each shelter and vehicle. Tie-down kits are comprised of custom designed brackets (includes two left and two right brackets) with Peck & Hale's "Hi-Shock" Chain tie-down (includes four 15MTC/1688 and four 15MTC/1688B tie-down assemblies). A shock-mitigating device with Hi-Strength heat-treated alloy, chain and matching load binder is used.

All tie-down kits, themselves, have been tested by ATC Aberdeen Proving Ground and the U.S. Army DACS in MacAlister, OK.

For more information or for a single part number for a customized shelter, call 800-355-2015
