

Truck-Mounted Contingency Response Communications System (CRCS™) Shelter

FEATURES

- Quick set-up to an immediate operational workspace with training in minutes - not days or weeks
- Available in neutral colors as well as camouflage
- Absolute information exchange (radio, internet, video) between all first responders
- Scalable IT services to fit your needs and requirements
- Environmentally controlled, powered, and secure operating environment

BENEFITS

- Proven, low-cost solution providing immediate, effective communication results
- Totally self-contained, self-powered, and portable (vehicle or container)
- Ease of use, training, and storage
- Fast set-up (less than five minutes) and fully operational in 30 minutes
- Bridges the gap between legacy and future communications devices - voice, data, radio and visual
- Provides complete interoperability - radio, video, telephone, satellite, internet
- Always on and dynamically reconfigurable as the incident evolves
- Reach back to command operations center within seconds, providing enhanced situational awareness and faster decision-making since “eyes and ears” are on the ground

ANTICIPATED OPERATING ENVIRONMENTS

- Federal, State, and Local incident response
- National Guard
- Law Enforcement
- Firefighters
- Public Health
- Disaster Recovery
- WMD
- Bomb Squads
- and many more

A CRCS shown loaded into a commercial 3/4 ton pick-up truck

PART NUMBER	DIMENSIONS	
20-00468	Exterior	79"W X 87"L X 70"H
	Interior	75"W X 78"L X 64"H
TARE WEIGHT	MAXIMUM GROSS WEIGHT	
770 lbs.	3,300 lbs.	

AAR has ingeniously integrated numerous platforms from simple to the most sophisticated command post platforms. With the assistance of key team partners, AAR offers a total IP-based C4 VI solution that exceeds tomorrow's requirements - today.

Our cutting-edge technology provides a common solution to Voice, Video and Data sharing for first responders from the person on the ground to respective levels of command and control.

AAR's CRCS™ interoperability system establishes reliable communications within minutes with quick simple set-up anywhere for first responders, such as National Guard, firefighters, police, and volunteers, using radio, video, voice, and data technologies. These technologies, including live VOIP streaming video, allow emergency services leadership to follow critical situations as they develop from secure locations, make important decisions quickly and deploy resources to where they are needed most.

The truck-mounted CRCS fits in the back of a 3/4 ton pick-up truck or a HMMWV and runs off a regular power source or generator. It can also be airlifted by helicopter, allowing it to be moved into the heart of an emergency situation

For more information or for a single part number for a customized shelter, call 800-355-2015
