Value Support Engineer

AAR Aircraft Component Services – Amsterdam (ACS AMS) is looking for a professional in the aviation-engineering field. Someone who is analytically strong, able to share knowledge, provide and implement technical solutions, act in compliance with regulations and be a sparring partner to the Engineering team members and other departments.

As Value Support Engineer, you report to the Manager Engineering and you will be a member of an extremely driven and dynamic team of young professionals. You will form a team with four more Value Support Engineers, two Development Project Engineers and a work planner/draftsman. Together with your team, the aim is to increase the value proposition of AAR Aircraft Component Services – Amsterdam (ACS AMS) by preparing and presenting technical advice and/or solutions. A second major element of this position is the focus on continuously reducing costs in the repair process by supporting other departments during daily activities and by setting up and managing innovative repair procedures. You will be encouraged to share potential innovations and you will have room for personal and professional development.

A grasp of your tasks or responsibilities:
- Developing new repairs in collaboration with specialized companies
- Introducing new repair methods within the aviation industry
- Managing technical contacts with repair vendors (specialized companies)
- (ad hoc) Preparation of reliability/technical studies in consultation with the OEM, vendors and customers
- Maintaining (expired) capabilities, performing upgrades
- Project-based contribution to business opportunities within all facets of the company

Who are you?
You are analytically strong, but also technically well educated. You have the ability to work and think on at least higher vocational education (hbo) level with a technical background (experience within aviation engineering or equivalent is a plus). You are able to work both independently and in a team and you have a can-do mentality. In your communication, you are confident, assertive and able to convince others.

What do we offer?
- A dynamic and international working environment
- An position with broad responsibility
- Committed and knowledgeable colleagues
- Good primary and secondary labor conditions, such as:
  o Excellent growing opportunities
  o Year-end bonus
  o Attractive pension scheme
