

[AAR Aircraft Component Services](#) overhauls, repairs and maintain rotatable components for virtually every type of aircraft. In the military field AAR has built up an extensive experience in servicing components of the F16 & AWACS aircrafts. Also other aircraft type components like for the Airbus & Boeing are being serviced. Our highly skilled employees provide a range of repair services in Amsterdam (Hoofddorp) and New York.

Manager Engineering | Amsterdam Hoofddorp

The position

Leading the Engineering Team by example, that's what this role is all about. And liaising with Commercial Operations and Business Development to understand, coordinate and manage Capability Development Projects. 'Capability Development' ensures and executes the repair services to existing and new customers.

Our purpose: [Doing It Right!](#)

This means constantly searching for the right thing to do for our customers, for our employees, for partners and for society. We wake up in the morning knowing we have to deliver and at the end of the day believe we did our best and encouraged to return the next day and do even better. We do not rest on our earlier accomplishments.

The same goes for leading and participating in this Excellent Engineering Team!

The Engineering Team

Whether it concerns Robotics, Mechatronics, Software Development, Hydraulics, Electrical- and Mechanical Engineering, this team is proudly doing it right.

This Excellent Engineering Team of 6 (fte), consists of Value Support Engineers, Development Project Engineers and a Design Engineer. All based in Hoofddorp (NL)

Teaming up with Commercial Operations & Business Development, this role is reporting directly to [Taco Vingerhoed](#) (Director Commercial & Business Development)

You are responsible for

- leading & inspiring the Engineering Team (Intent Based Leadership)
- developing innovative & lasting capabilities (Project & Program Management)
- improving the existing test capacity (Improvement Plans & License Control)
- finding and curating the best ideas to reduce costs for repairs (Cost Control)
- communicating regular & transparent with all stakeholders (Empathy)
- planning 'What' needs to be done and communicating 'Why'!

You have

- a technical mindset with a track record in Development Projects!
- preferably 8 - 10 years' industry experience (technical production facilities)
- extensive Program Management experience in Capability Development Projects
- relevant technical degree or the equivalent in terms of professional training
- a curious personality!

You

- live within travelling distance from [Hoofddorp](#) and feel at home in an international environment
- are a people's person leading in an open way & partnering naturally with all stakeholders
- take responsibility & share success
- can express yourself fluently in Dutch & English
- reach out, team up and deliver!

The invitation

AAR is where you decide your career path, people always remain our priority!

That's why and how we are building a diverse and inclusive workforce. We encourage applications from people of all races, ethnic origins, religions, abilities, sexual orientations, gender identities, or expressions.

We are dedicated to the health and safety of our people, our customers, and the communities where we live and work.

AAR offers an interesting employment package, including a gross yearly salary (depending on experience) of approximately €55.000 - 65.000, - an attractive bonus structure of max 7%, 1%-1,5% profit share, a pension plan, 26 paid holidays (full-time), 28 hours work time reduction, phone, laptop, and a pleasurable work environment.
