

[AAR Aircraft Component Services](#) overhauls, repairs and maintain rotatable components for virtually every type of aircraft. In the military field AAR has built up an extensive experience in servicing components of the F16 & AWACS aircrafts. Also other aircraft type components like for the Airbus & Boeing are being serviced. Our highly skilled employees provide a range of repair services in Amsterdam and New York.

(Senior) Product Manager | Amsterdam *Hoofddorp*

The position

Making our IT system more efficient & user friendly, that's what this role is all about. This means being the liaison between business and technology teams as they guide the effort of introducing a wide range of products and technologies. By focusing first on an overhaul of the technology in use, contributing to the developing of a product strategy to set the direction for tomorrow. (Vision!)

Our purpose: [Doing It Right!](#)

This means constantly searching for the right thing to do for our customers, for our employees, for partners and for society. We wake up in the morning knowing we have to deliver and at the end of the day believe we did our best and encouraged to return the next day and do even better. We do not rest on our earlier accomplishments.

The same goes for the efficiency in all our operational & IT processes. This is the purpose of this position.

The IT Team

From our various locations in Europe & the US we are proudly serving about 6.000 colleagues on both sides of the Atlantic!

Teaming up with colleagues dealing with Software Development, Operations & Product Management, reporting directly to Lucy Elarby (Director Product Management) based in Reading (GB) whilst working closely with [Denis Young](#), [Esther Luijendijk](#) and [Eric Bron](#) based in Hoofddorp (NL) to thoroughly understand and see through the business processes why & how.

You are responsible for

- working with operational (production) teams and leadership to really understand the needs (empathy)
- creating a vision & a product strategy
- finding and curating the best ideas to improve the efficiency in the IT processes
- managing & realising 'projects' involving all stakeholders
- communicating regular & transparent with all stakeholders that are facilitating cross collaboration throughout the development lifecycle
- seeking to improve the product based on feedback from users/customers, local leadership, and the development team

You have

- a strategic mindset & overview to grasp how to develop and implement automated efficiency solutions in production processes!
- preferably 3 - 5 years' IT industry experience (technology modernisation projects)
- extensive experience in spearheading customer interactions for technical implementations
- solid market knowledge, insight, and subject matter expertise
- what it takes to gain immediate credibility at all levels, in- and outside the organisation
- relevant degree in Business / IT or the equivalent in terms of professional training
- a curious personality!

You

- live within travelling distance from [Hoofddorp](#) and feel at home in an international environment
- are a people's person communicating in an open way and partner naturally with all stakeholders
- take responsibility and share success
- can express yourself fluently in Dutch & English
- reach out, team up and deliver!

The invitation

AAR is where you decide your career path, people always remain our priority!

That's why and how we are building a diverse and inclusive workforce. We encourage applications from people of all races, ethnic origins, religions, abilities, sexual orientations, gender identities, or expressions.

We are dedicated to the health and safety of our people, our customers, and the communities where we live and work.

AAR offers an interesting employment package, including a gross yearly salary (depending on experience) of approximately €60.000 - 90.000, - an attractive bonus structure of max 7%, 1%-1,5% profit share, a pension plan, 26 paid holidays (full-time), 28 hours work time reduction, phone, laptop, and a pleasurable work environment.
