

Position: Director Supply Chain

What will you do?

As Director Supply Chain, you are responsible for ensuring that the supply chain and logistics processes function optimally within a dynamic and technically oriented environment. You ensure that materials, parts and services are available in a timely manner, so that internal and external customers can count on reliable service.

You organize, plan and coordinate the daily activities within the supply chain and logistics departments and monitor the progress of orders, deliveries and stock management. In addition, you provide input for quotations and customer solutions by providing insight into costs, availability and delivery times of parts and repairs.

Together with colleagues from Sales, Engineering, Finance and Operations, you ensure efficient coordination of processes and you are an important link between the organization and suppliers. En je doet nog veel meer, zoals:

1. Identifying and implementing improvements within supply chain, logistics and business processes.
2. Coordinating logistics and supply chain projects, ICT adjustments and continuous improvement initiatives.
3. Monitoring agreed stock levels, service levels and delivery reliability.
4. Drafting, analyzing and presenting KPI reports and management information.
5. Supporting Sales and Engineering in the logistical and operational assessment of new business opportunities.
6. Managing forecasts, inventory forecasts and working capital.
7. Identifying bottlenecks in order, purchasing and delivery processes and initiating sustainable solutions.
8. Acting as a point of contact for logistical issues within the organization.

Purpose?

This position offers you the opportunity to make a direct contribution to the performance of the organization. You will be given a lot of responsibility and space to implement improvements that visibly impact customer satisfaction, operational performance and business results.

You will work at the intersection of Supply Chain, Operations, Procurement, Finance and Sales, so no two days are the same. Your ideas and initiatives are appreciated and you are given plenty of room to improve processes and successfully realize projects.

In addition, you will have the opportunity to:

1. To play an important role in the further professionalization of the supply chain organization.
2. Influence inventory management, service levels and delivery reliability.
3. Connecting strategic and operational issues.
4. Initiate and implement improvement projects.
5. Collaborate with internal and external stakeholders at different levels.

We are looking for a result-oriented professional who keeps an overview, switches quickly and gets energy from improving processes and collaboration.

You are able to translate operational challenges into structural improvements and know how to successfully connect different interests. In addition, you have excellent communication skills and naturally take the lead in projects and improvement initiatives.

Your profile as Director Supply

1. You monitor the progress of work and make adjustments where necessary.
2. Take your initiative and show your ownership.
3. You are analytically strong and decisive.
4. You can deal well with changing priorities.
5. You work accurately and in a structured way.
6. You know how to connect people, processes and performance.

In addition, you have:

1. Bachelor / MSC - working and thinking level, preferably in the direction of Supply Chain Management, Logistics, Technical Business Administration or Business Administration.
2. Several years of experience within Supply Chain, Logistics, Procurement or Operations.
3. Experience with forecast planning, inventory management and process optimization.
4. Knowledge of ERP systems and supply chain processes.
5. Experience with KPI management and data analysis.
6. Strong communication skills in both Dutch and English.
7. Experience with stakeholder management at different organizational levels.
8. Experience with project-based work and continuous improvement methodologies is an advantage.

What to expect

1. A challenging position with a lot of responsibility and impact.
2. A key role within an international and technically oriented organization.
3. Plenty of room for own initiative and process improvements.
4. Collaboration with driven professionals within different disciplines.
5. Opportunities for personal development and professional growth.
